

Geography and Geographic Information Science (GEOG)

B.S. with a Major in Geography (<https://catalog.und.edu/undergraduateacademicinformation/departmentalcoursesprograms/geography/geog-bs/>)

Minor in Geography (<https://catalog.und.edu/undergraduateacademicinformation/departmentalcoursesprograms/geography/geog-minor/>)

Minor in Geospatial Technologies (<https://catalog.und.edu/undergraduateacademicinformation/departmentalcoursesprograms/geography/geog-minor-gt/>)

B.S. with Major in Geography - Global Human Environment Sub-plan (p. 1)

B.S. with Major in Geography - Geospatial Science Sub-plan (p. 1)

B.S. with Major in Geography - Global Human Environment Sub-plan

Freshman Year

Fall		Credits
COMM 110	Fundamentals of Public Speaking	3
ENGL 110	College Composition I	3
GEOG 151	Human Geography	3
GEOG 161	World Regional Geography	3
Essential Studies Elective (see advisor)		3
Credits		15

Spring		Credits
ENGL 130	Composition II: Writing for Public Audiences	3
GEOG 121 & 121L	Global Physical Environment and Global Physical Environment Laboratory	4
Essential Studies Electives (see advisor)		8
Credits		15

Sophomore Year

Fall		Credits
Geography Elective (see advisor)		3
Essential Studies Electives (see advisor)		12
Credits		15

Spring		Credits
GEOG 274	Introduction to Geospatial Technologies	3
Geography Elective (see advisor)		3
Essential Studies Electives		9
Credits		15

Junior Year

Fall		Credits
GEOG 352	Economic Geography	3
GEOG 471 & 471L	Cartography and Visualization and Cartography and Visualization Laboratory	3
SOC 326	Sociological Statistics ¹	3
or ECON 210	or Introduction to Business and Economic Statistics	
or PSYC 241	or Statistics for the Behavioral Sciences	
or MATH 321	or Applied Statistical Methods	
or BIOL 470	or Biostatistics	
Geography/Essential Studies/General Electives (see advisor)		6
Credits		15

Spring

GEOG 457	Urban Geography and Planning ²	3
GEOG 474 & 474L	Introduction to Geographic Information Systems (GIS) and GIS Laboratory	3
Geography/Essential Studies/General Electives (see advisor)		9
Credits		15

Senior Year

Fall		Credits
Geography/General Electives (see advisor)		15
Credits		15

Spring

GEOG 454	Conservation and Sustainable Use of Natural Resources	3
Geography/General Electives (see advisor)		12
Credits		15
Total Credits		120

¹Statistics courses may be offered in other semesters

²Check course rotation for when Geog 457 is being offered

This is one suggested plan for students to complete the major in four years. The Geography major is flexible, and students are encouraged to take more courses in the subject area as well as other departments. Students considering secondary education licensure in geography must work with the Department of Teaching and Learning for admission and licensing requirements. Please work closely with your faculty and academic advisors to develop a plan that fits your academic and career goals. Finally, students are encouraged to complete at least one internship in their field, and consider study abroad programs.

B.S. with Major in Geography - Geospatial Science Sub-plan

Freshman Year

Fall		Credits
ENGL 110	College Composition I	3
GEOG 121 & 121L	Global Physical Environment and Global Physical Environment Laboratory	4
GEOG 151	Human Geography	3
Essential Studies Electives (see advisor)		5
Credits		15

Credits		15
Total Credits		120

¹Statistics courses may be offered in other semesters.

This is one suggested plan for students to complete the major in four years.

The Geography major is flexible, and students are encouraged to take more courses in the subject area as well as other departments. Please work closely with your faculty and academic advisors to develop a plan that fits your academic and career goals. Students considering secondary education licensure in geography must work with the Department of Teaching and Learning for admission and licensing requirements. Finally, students are encouraged to complete at least one internship in their field, and consider study abroad programs.

GEOG 121. Global Physical Environment. 3 Credits.

A study of the pattern of distribution of the physical elements of the global environment. The origin and characteristics of the terrestrial grid, earth-space relations, climate, landforms, vegetation, and soils. Prerequisite: MATH 98 or higher. F,S,SS.

GEOG 121L. Global Physical Environment Laboratory. 1 Credit.

A basic environmental science laboratory to complement Geography 121. F,S,SS.

GEOG 122. Foundations of Environmental Science. 3 Credits.

Introduction to the study of environmental dimensions of human activities, emphasizing the interdisciplinary nature of environmental studies. The course integrates principles of natural science, social science, policy, and humanistic perspectives needed understand and solve environmental problems, and to communicate those problems, policy options, and solutions to various constituencies. S.

GEOG 134. Introduction to Global Climate. 3 Credits.

An introduction to the global climate, emphasizing atmospheric processes, weather and climate elements, and climate change. Emphasis is placed upon the factors that control climate and climatic distributions. S.

GEOG 134L. Introduction to Global Climate Laboratory. 1 Credit.

A basic physical science laboratory focused upon specific atmospheric-climatic phenomenon; wet and dry lab experiments, plus written lab exercises. S.

GEOG 151. Human Geography. 3 Credits.

A systematic analysis of people's cultural regions including settlement patterns and change via migration and diffusion. F,S,SS.

GEOG 161. World Regional Geography. 3 Credits.

Development of the concept of region with analysis of the relationship of physical and cultural features to the contemporary world situation. F,S,SS.

GEOG 250. Introduction to Geopolitics. 3 Credits.

As a branch of political geography, the study of Geopolitics is concerned with the spatial dynamics of power relations especially at the international level. From a geographic perspective, this course surveys changing relations among states and the influences of national and transnational actors and events. The course attempts to help students apply a broad range of theoretical perspectives to the analysis of global and regional issues and events, and develop insights into what is happening in the world today. From war and terrorism to economic globalization, human rights and sustainable development, this course will explore a myriad of important issues and challenges that face the world today. S, odd years.

GEOG 262. Geography of North America I. 3 Credits.

A spatial approach to the development of Canada and the United States which emphasizes the transformation of the cultural landscape by exploring the contributions of the diverse peoples who inhabit the two nation-states and deal with a global economy. F,S,SS.

GEOG 263. Geography of North Dakota. 3 Credits.

Study of the interrelationships that exist between North Dakota's physical and cultural environments. Specific topics include physiography, climate, flora, prehistoric occupation, historic development, demography, and economic structures. On demand.

GEOG 274. Introduction to Geospatial Technologies. 3 Credits.

Students engage with a range of geospatial technologies to explore, analyze, and represent geographical phenomena and data through a series of field-based exercises. Students will learn about the types of societal problems that geospatial scientists are uniquely positioned to solve. Through guest speakers, readings, and discussions, they will learn about the knowledge and skills required to enter this rapidly-expanding career field and the courses in the geography curriculum that will help them to acquire these skills. S.

GEOG 294. Introduction to Undergraduate Research. 4 Credits.

Introductory experience as a research assistant working alongside graduate researchers or faculty. A total of 45 hours is typically required over the course of the semester per credit. Prerequisite: Consent of instructor. F,S,SS.

GEOG 300. Special Topics in Geography. 1-3 Credits.

Topic of course will change from semester to semester but will typically emphasize recent developments in geography. Repeatable to six credits. Repeatable to 6.00 credits. F,S,SS.

GEOG 322. Environmental Hazards. 3 Credits.

An overview of the field of environmental hazards emphasizing risk assessment, hazard impacts, human vulnerability, and hazard mitigation. Prerequisite: GEOG 121 and GEOG 161 or consent of instructor. On demand.

GEOG 334. Climatology. 3 Credits.

An overview of the field of climatology, emphasizing surface transfers of energy and water, the general circulation of the atmosphere, and climate change. Prerequisite: GEOG 134 or ATSC 110. On demand.

GEOG 352. Economic Geography. 3 Credits.

A study of the local, national, and global economic life describing and explaining the geographic factor involved in the production, distribution, and consumption of the major commodities and resources of the world. Special emphasis is placed upon the global issue of the underdeveloped or Third World countries and theories, which have been, developed to explain spatial structure. Prerequisite: Sophomore standing or consent of instructor. F.

GEOG 362. Geography of Canada. 3 Credits.

A regional and topical analysis of the physical, cultural and economic features of Canada. S.

GEOG 374. Environmental Remote Sensing. 2 Credits.

A thorough examination of optical, infrared, and microwave methods for remote observation of Earth systems, with a focus on the use of aircraft and satellite data for addressing environmental problems. The course includes an overview of modern remote sensing systems for data collection at a variety of scales, as well as an introduction to digital image processing. Corequisite: GEOG 374L. F.

GEOG 374L. Environmental Remote Sensing Laboratory. 1 Credit.

A systematic coverage of visual and digital laboratory techniques used to interpret aerial photography and satellite imagery. Students gain hands-on experience assessing environmental problems using remotely sensed data. Corequisite: GEOG 374. F.

GEOG 378. Global Positioning Systems: Applications and Theory. 2 Credits.

This course examines the equipment, procedures, and techniques related to GPS technology, as well as its integration with Geographic Information Systems. Foci include the fundamentals of satellite navigation, the history of GPS, and applications related to mapping and analysis in the environmental sciences. Strong emphasis is placed on providing hands-on experience. On demand.

GEOG 386. Geography Education Field Placement. 1-3 Credits.

A variable credit course with amount of credit depending upon the extent of the geographic education work of the student in a K-12 school setting. Recommended for secondary education social studies majors interested in how geography is taught at the high school level and for elementary/middle school social studies majors concerned about how federal legislation is affecting teaching grades K-8. Prerequisite: Department approval. Repeatable. F,S,SS.

GEOG 395. Experiential Learning. 4 Credits.

A practical work or volunteer experience associated with geography and/or geospatial science. Arranged by mutual agreement among student, department, and site location. A total of 45 hours is typically required over the course of the semester per credit. Prerequisite: Consent of instructor. F,S,SS.

GEOG 397. Cooperative Education. 1-2 Credits.

Supervised experience consistent with a student's career objectives. Formal application to, or interview with, site required. A total of 300 hours is typically required over the course of the semester per credit. Prerequisite: Consent of Department Co-op Coordinator. Repeatable to 6.00 credits. S/U grading. F,S,SS.

GEOG 421. Selected Topics in Physical Geography. 3 Credits.

An examination of an advanced physical geography topic chosen from field methods, biogeography, human impact on the environment, physiography, or others. Repeatable to nine credits if different topics are examined. Prerequisite: GEOG 121 or consent of instructor. Repeatable to 9.00 credits. On demand.

GEOG 452. Selected Topics in Economic Geography. 3 Credits.

Selected topics in economic geography including but not limited to industrial location, transportation, rural economic development, and others. Repeatable to nine credits if different titles are examined. Prerequisite: GEOG 151 or consent of instructor. On demand.

GEOG 453. Historical Geography. 3 Credits.

Using the spatial approach, landscape change is analyzed over time in various regions of the world using a variety of scales of study. Emphasis is placed upon the relationship of historical geography to historic preservation and tourism. F.

GEOG 454. Conservation and Sustainable Use of Natural Resources. 3 Credits.

Geographic principles applied to the analysis of natural resources and their efficient utilization. Emphasis is on sustainable development. S.

GEOG 457. Urban Geography and Planning. 3 Credits.

This course examines the internal workings of cities from political, economic, and social perspectives. Geographic approaches to urban analysis are discussed, as are various methods for contemporary urban planning. Students learn to view the city as a geographic phenomenon created by human effort. S, odd years.

GEOG 458. Community Development. 3 Credits.

This course examines the historical evolution, conceptual framework, and implementation of community development. Students will be introduced to a broad range of community development issues from a geographical perspective with emphasis on local and statewide scales of study. Prerequisite: GEOG 151 or consent of instructor. On demand.

GEOG 459. Population Geography. 3 Credits.

The core components of population change (fertility, mortality, migration) are explored in the context of contemporary and historical population debates. The course focuses on understanding and critically assessing global, regional, national, and local population trends and issues. Topics include the impact of population growth, spatial diffusion processes, migration trends and theories, aging of societies, and population policies. On demand.

GEOG 462. Geography of North America II. 3 Credits.

A regional analysis of the physical, cultural, and economic features of a selected region or group of regions within North America. May be repeatable to six credits if a different region is examined. Prerequisite: GEOG 262 or consent of instructor. On demand.

GEOG 463. Regional Geography. 2-3 Credits.

A regional and topical analysis of the physical and cultural features with emphasis on one continent or region. May be repeated up to nine credits provided different regions and approaches are involved. Repeatable to 9.00 credits. S.

GEOG 471. Cartography and Visualization. 2 Credits.

This course examines the art, science, and technology of cartography and visualization. It familiarizes students with basic cartographic principles and with GIS, both of which are applicable to a wide range of professional fields and academic disciplines. Students learn how maps are designed and used to accurately represent and effectively communicate spatial phenomena and relationships. The course also includes a discussion of selection of proper thematic mapping techniques. Corequisite: GEOG 471L. F.

GEOG 471L. Cartography and Visualization Laboratory. 1 Credit.

Students apply concepts learned in GEOG 471 to produce accurate, appropriate and well-designed maps using GIS software. Lab activities hone the ability of students to be informed producers and consumers of maps and provide hands-on experience that demonstrates how maps function as a communicative visual medium. Corequisite: GEOG 471. F.

GEOG 474. Introduction to Geographic Information Systems (GIS). 2 Credits.

An introductory course that examines the digital representation, manipulation, and analysis of geographic data, with emphasis on the analytical capabilities that GIS brings to bear on the solution of geographic problems. Corequisite: GEOG 474L. F,S.

GEOG 474L. GIS Laboratory. 1 Credit.

Hands-on application of theory and methods associated with digital spatial data representation, manipulation, and analysis. Corequisite: GEOG 474. F,S.

GEOG 475. Digital Image Processing. 3 Credits.

A course focused on the concepts and principles involved in the use of digital remotely sensed data as they are applied to environmental monitoring and natural resource management. Emphasis is placed on algorithm development and 'hands-on' application of digital techniques to select imagery. Prerequisite: GEOG 374 and 374L. S, odd years.

GEOG 476. Selected Topics in Geographic Information Systems. 3 Credits.

An examination of a specific application area or set of techniques in GIS including, but not limited to, Business GIS, Environmental GIS, GIS Databases, GIS Scripting and Web-Based GIS. Repeatable to six credits if different topics are examined. Prerequisite: GEOG 474 and GEOG 474L, or instructor consent. Repeatable to 3.00 credits. On demand.

GEOG 494. Undergraduate Research. 4 Credits.

Advanced experience as a research assistant working alongside graduate researchers or faculty. A total of 45 hours is typically required over the course of the semester per credit. Prerequisite: Consent of instructor. Repeatable to 6.00 credits. F,S,SS.

GEOG 497. Internship. 8 Credits.

Supervised experience consistent with a student's career objectives. Formal application to, or interview with, site required. A total of 75 hours is typically required over the course of the semester per credit. Prerequisite: Consent of the supervising faculty member. Repeatable to 3.00 credits. S/U grading. F,S,SS.
